

# St. Francis de Sales Kindergarten

## A Day in the Life...

Each day begins with a morning meeting with calendar, the one hundreds chart, math songs, prayer, and a special way to say hello. Our Superkid friends teach us how to read and for math we play games to learn our numbers. We also have religion everyday. We have science, physical education and music two days a week. Once a week we have social studies and art.

### Reading:

Using the Superkids Curriculum we learn letter and sound recognition, sound and letter association. We also learn rhyming skills and word families. Towards the end of the year we work on reading comprehension and proper block handwriting formation.

### Math:

Our math curriculum is very hands on. Through songs and games we are introduced to sorting, patterns, positions, numbers to 100, graphs, etc. We also focus on addition, subtraction, money, time, and measurement.

### Religion:

Our focus is on Jesus' time on earth. We also focus on popular Bible stories. A great deal of time is spent on the saints and the sacraments. Through prayer and weekly mass participation we grow closer to God and His love.

### Writing:

We are introduced to journaling early in the year. This helps with learning sentence structure, sounding out letters, words, and punctuation.

### Science:

We complete our curriculum using a virtual lab online. We learn about the scientific method by completing hands on experiments.

### Social Studies:

We read stories about different communities. We also discover different jobs and maps.

### Special Activities:

- 3 Recesses
- Play Time Daily
- Additional Movement throughout the day
- A Family ☺
